

The CREST FIRE SIREN will be up and ready to test. Thanks to SDG & E a new pole will be brought to Crest this week. George Bolby, our super electrician, will be changing out the wiring to the new pole. Notices about the testing of the siren will begin as soon as we are ready. I will send out a oneCall Now call to all as well as put the notice of date, day, and time on the 2 sign boards. Once the siren goes off, I will ask that you call 44-CREST to give us your location and whether you did or did not hear the siren.

Another great bit of news! We now have the supplies to create the amateur Ham Radio station at the clubhouse. Notices will go out for the Ham classes to take if you are interested in becoming certified.
